

What is jdbc with architecture

Explain the jdbc 5 steps with all steps

Explain batch execution

Why we need database

Client req:

A Government want build application for public where they can apply for voter id by taking details of name,email,phone,age,nationality , address provide the voter Id if his age is more than 18 and only he is INDIAN , store data in voter database don't allow duplicate mobile number

Note: use java Bean class

- Build the logic

- Bulild CLI application

- Take any other information if necessary
